RE: Reclamation of Leases
ML 41338 OS, ML 39198 Gilsonite
ML 41244 OG&H, ML 33269 Gil.,
and ML 849 Gil.

Dear Mr. Smith:

On June 25, 1984 American Gilsonite Bonanza Mining Operations received notice from the Department of Natural Resources that leases ML 41338 OS, ML 39198 Gilsonite, ML 41244 OG&H, ML 33269 Gilsonite, and ML 849 Gilsonite had been granted to two (2) separate entities, see enclosed letters. It is understood that American Gilsonite is afforded a remedy by statute for damages to any improvements placed by AGC on these lands as a result of the operations under the leases. American Gilsonite does, however, request verification that the two parties involved will be responsible for reclamation of land affected by their actions.

Thank you for your cooperation in this manner. Should you have any questions concerning the situation please contact me at the above address or telephone number.

Sincerely,

Gentlemen:

RE: ML 41338 OS
ML 39198 Gilsonite

We wish to advise you that the Director, on April 2, 1984, granted an Oil Shale lease to Geokinetics Inc., 391 Chipeta Way, D-2, Salt Lake City, UT 84108-1282, on the following land which is embraced in your Gilsonite lease 39198: T9S, R23E, SLB&M., Section 32, A11.

This mineral lease gives the lessee the right to enter upon this property to explore for and to mine, remove, and produce the minerals specified in this lease. You are, however, afforded a remedy by statute for damages to any improvements you have placed on these lands as a result of operations under this lease.

We have advised the mineral lessee of his obligations to you under this lease and have advised him to contact you and to work out any problems of access to this property prior to the commencement of operations.

If you have any questions concerning this matter or observe any violations of the lease provisions, we would appreciate your contacting this office.

Yours very truly,
